

FEAR OF WALKING ALONE

Together, we can create a safer environment for women.

Data Obtained From GSS

GSS (General Social Survey) is a project funded by the National Science Foundation and allows the public to readily access their data.

Is any area that is within a mile of you where you would be afraid to walk alone at night ?

Respondents of men and women were asked to answer this question throughout the years of 1973 through 2021.

In 1973,

41.06%

of respondents were afraid of walking alone.

In 2021,

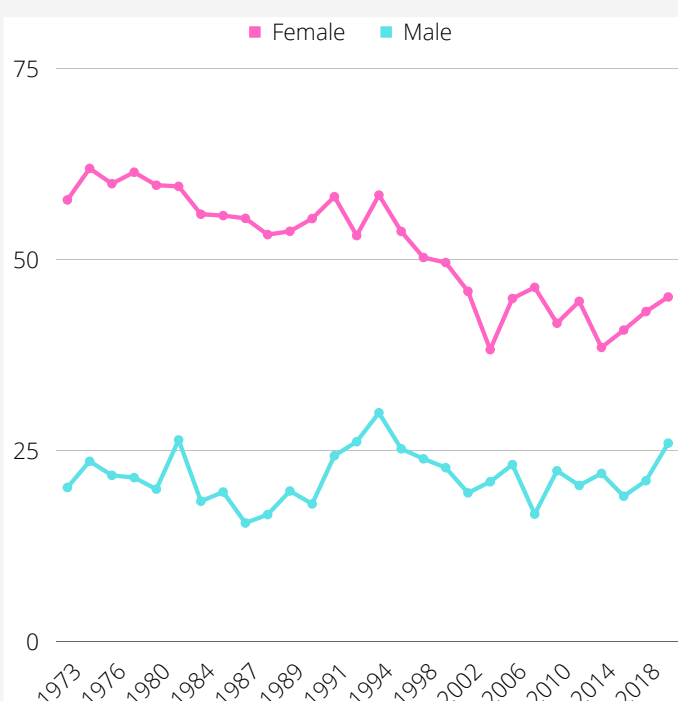

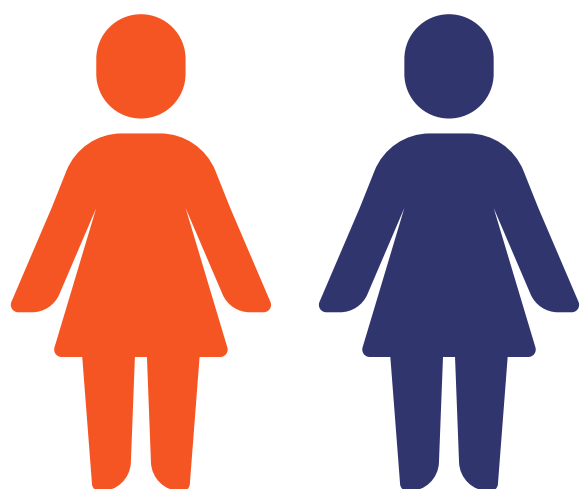

39.37%

of respondents were afraid of walking alone.

Women Afraid of Walking Alone in 2021

1 out of 2

Where as 1 out of 4 men are afraid of walking alone.

The percentage difference of fear for women is

29.5%

higher on average compared to men.
